Model A-750 Alignment Tool Set

- A design that adapts to most smaller equipment.
- Three different radius surfaces for indicator readings.
- Fits Shafts or hubs up to 2.8".
- Can be rotated with only 3" shaft to base clearance.
- Expands to 9".
- 1/2" thick
- This model replaces the older Model A-500. It is smaller and more compact to fit in very tight places.
- It will fit most of the ANSI style pumps.

Model A-1000 Alignment Tool Set

- Designed to clamp to shaft and reach over coupling.
- Fits shafts from 1" to 5".
- Expands to 18".
- Hub to Bar clearance is 3.5".
- This is a great set for aligning most average size equipment.

[Model A-2000 Alignment Tool Set](#)

- **Designed to clamp to coupling and reach over flange.**
- **Fits hubs from 3" to 10½".**
- **Expands to 18".**
- **Hub to bar clearance is 2¾".**
- **1" thick.**
- **Great alignment set for larger disk packed couplings.**

[Model A-3000- Our Most Popular Kit](#)

- **This is the Combination Set.**
- **Features both the A-2000 and A-1000 in the same case.**
- **This is our most popular set because it fits most everything from 1" to 10½".**
- **Great for field servicemen.**
